Camberwell Car Park

City of Boroondara Community Survey

Wallis Reference: 4899

Date: August 2021

Report prepared for:

City of Boroondara

Wallis Social Research achieved accreditation to the International Standard ISO20252 in September 2007. The Company is committed to maintaining administrative and operational procedures which comply with these accreditation requirements and to improving its performance in all aspects of the service it delivers to its customers.

In 2020 Wallis sought and attained certification to ISO 27001. This is the highest standard for information and data security. Wallis made the strategic decision to become certified to ISO 27001 because we recognise the absolute necessity for our clients to be assured that their data is secure. Wallis is one of the first research companies in Australia to achieve certification to this standard.

Wallis is an active participant in the market research industry, with senior staff making significant contributions to the Research Society (TRS) and the Australian Data and Insights Association (ADIA). As such we actively pursue the ethical objectives of the industry.

In addition to having attained the highest Industry accreditation, Wallis also participates in the Australian Achiever Awards, which recognises the customer service excellence of Australian companies. The Company has been awarded a high commendation every year since the inception of these awards in 1999.

Wallis is an acknowledged leader in data protection and privacy. Our system is regularly subjected to external penetration testing and we are a Privacy Awareness Week supporter – committed to sharing our knowledge with others. Wallis is also active member of the Australian Cyber Security Centre (ACSC) Partnership Program.

1 About this survey

This research was conducted by Wallis Social Research in late August 2021. The survey was given to randomly selected adults living within a 15km catchment of Camberwell Station, with a total of 528 interviews completed*. An estimated 262,174 adults live in this catchment.

The survey found a strong level of demand for additional parking near Camberwell Station. This demand is highest amongst people who live 0-5km and 5-10km from the station.

Map of demand levels amongst commuters for weekday car parking near Camberwell Station:

Map of 5km, 10km and 15km catchments from Camberwell Station. Catchments are elliptical (rather than circular) and offset against the Central Business District (CBD) (each catchment extends 1.5km from the station towards the CBD with the remainder extending to the east). The overall area 'fans' eastward from Camberwell Station by up to 15km (the 1.5km westward extension of each catchment is added to the requested catchment distance, so a 5km catchment has a total length of 6.5km).

Considering the shape of the elliptical catchments, the principal axis follows the east-west orientation of the Lilydale/Belgrave line and the sizes are as follows:

- 5km catchment shown in orange (length: 6.5km / height: 6.5km)
- 10km catchment shown in pink (length: 11.5km / height: 8.5km)
- 15km catchment shown in blue (length: 16.5km / height: 11km)

These catchments take into account the direction of travel (most people travel to the CBD) and the fact that areas to the north and south are serviced by other train lines. This means the overall survey areas are elliptical (rather than circular) and spread 1.5km west of Camberwell Station with the remainder spreading east.

The suburbs within the 15km catchment of Camberwell Station included all or parts of: Ashburton, Ashwood, Balwyn, Balwyn North, Blackburn, Blackburn South, Box Hill, Box Hill

North, Burwood, Burwood East, Camberwell, Canterbury, Chadstone, Doncaster, Doncaster East, Donvale, Forest Hill, Glen Iris, Glen Waverley, Hawthorn East, Kew, Mitcham, Mont Albert, Mount Waverley, Nunawading, Park Orchards, Ringwood, Surrey Hills, Vermont, Vermont South, Wantirna.

Notes on this report:

****People who participated are representative of the residents in the catchment areas (gender, age groups, NESB and labour force participation). A minimum of 382 participants were sought in order to achieve a +/-5% margin of error, at a 95% confidence level.**

Results are displayed by the distance people live from Camberwell Station and are colour coded throughout.

Results are displayed by the distance people live from Camberwell Station.

- Results flagged as '0km-5km' represent the views of the estimated 69,212 adults living between 0km and 5km from Camberwell Station
- Results flagged as '5km-10km' represent the views of the estimated 89,694 adults living between 5km and 10km from Camberwell Station
- Results flagged as '10km-15km' represent the views of the estimated 103,268 adults living between 10km and 15km from Camberwell Station
- Results flagged as '0km-15km' represent the views of the estimated 262,174 adults living between 0km and 15km from Camberwell Station.

2 Summary

Results in this summary section represent the views of adults living between 0km and 15km from Camberwell Station.

- 73% of people surveyed felt positively about additional free car parking near Camberwell Station

Ways people travel to Camberwell area:

- 83% of people who visit the area travel to Camberwell by car
- 16% of people who visit the area travel to Camberwell on foot

Note: Some people sometimes drive and sometimes walk to the Camberwell area. For this reason, the numbers don't add to 100%.

Top 3 places people currently park when they drive to Camberwell station:

- 47% at station
- 23% on residential streets
- 7% on main streets

Most frequently suggested advantages

We asked:

“What do you think the potential benefits are of providing additional car parks near the train station?”

- 36% of all responses suggested more people would use public transport
- 26% of all responses suggested increased convenience/easier access
- 25% of all responses suggested less cars/congestion/traffic

Most frequently suggested disadvantages

We asked:

“What do you think the potential disadvantages are of providing additional car parks near the train station?”

- 28% of all responses suggested more traffic/congestion
- 7% of all responses suggested increased crime
- 12% of responses mentioned the loss of buildings/taking up other space/compulsory acquisition. However any new parking near Camberwell Station will be added to an existing car park and will not take up other space or involve an acquisition of land.

3 Community sentiment

People’s sentiment towards additional free carparking near Camberwell Station:

- 73% of all people surveyed felt positively about additional free car parking near Camberwell Station (NET Positive: Somewhat positive + Very positive)

Table 1: Sentiment of people living within 15km of Camberwell Station

	TOTAL	0 5km	5 10km	10 15km
Very positive	42%	30%	50%	49%
Somewhat positive	42%	39%	27%	26%
Neutral	17%	18%	16%	17%
Somewhat negative	4%	6%	4%	2%
Very negative	4%	6%	2%	2%
Don't know	3%	1%	2%	6%
Base (n=)	262,174	69,212	89,694	103,268

Question A4: How do you feel about the possibility of providing additional car parks near train stations considering both the benefits and disadvantages? Do you feel...

Note: When figure totals do not equal 100% this is due to rounding

4 Perceived advantages and disadvantages

Advantages

We asked:

"What do you think the potential benefits are of providing additional car parks near the train station?"

Table 2: Top 4 advantages

	TOTAL	0 5km	5 10km	10 15km
More people would use public transport	36%	38%	33%	36%
Increased convenience/easier access	26%	21%	37%	23%
Less cars/congestion/traffic	25%	27%	29%	19%
More parking is needed/it will reduce nearby street parking	19%	16%	19%	23%
Base (n=)	262,174	69,212	89,694	103,268

Question A2: What do you think the potential benefits are of providing additional car parks near train stations?

Disadvantages

We asked:

"What do you think the potential disadvantages are of providing additional car parks near the train station?"

Table 3: Top 4 disadvantages

	TOTAL	0 5km	5 10km	10 15km
More traffic/congestion	28%	37%	28%	17%
Increased crime	7%	6%	6%	8%
Taking up of other space/loss of other buildings/compulsory acquisition*	12%	13%	10%	12%
None/no disadvantages	15%	11%	12%	21%
Base (n=)	262,174	69,212	89,694	103,268

Question A3: And what do you think the potential disadvantages are of providing additional car parks near train stations?

*This project will not involve any loss of other buildings or compulsory acquisition as the proposed additional car parking will be built on an existing car park

5 Demand

Who is most likely to use additional car parking near Camberwell Station?

Demand for additional car parking near the station has been estimated from people who told us they...

- Live within 15km of the station
- Work or study
- Travel to work or study using public transport
- Have access to a car

Table 4: People who are already commuters and who are very likely to use additional free car parks near the station on weekdays

	0 5km	5 10km	10 15km
Likely to use free car parks near the station on weekdays	4.5%	7.4%	1.3%
Base (n=)	69,212	89,694	103,268

Question PP1: How likely would you be to drive to Camberwell train station and catch the train on weekdays if there was free parking near the station?

Who else is likely to use additional car parking near Camberwell Station?

Table 5: People who are likely to use free parking near Camberwell Station to catch the train on weekdays or weekends

	0 5km	5 10km	10 15km
likely to use free parking near Camberwell Station to catch the train on weekdays or weekends	42%	43%	30%
Base (n=)	69,212	89,694	103,268

PP1 How likely would you be to drive to Camberwell station and catch the train on weekdays if there was free parking near the station?

PP2 How likely would you be to drive to Camberwell station and catch the train on weekends if there was free parking near the station?

Table 6: People who are likely to use free parking near Camberwell Station to shop or dine nearby

	0 5km	5 10km	10 15km
likely to use free parking near Camberwell Station to shop or dine nearby	60%	62%	44%
Base (n=)	69,212	89,694	103,268

Question PP3: How likely would you be to drive to Camberwell train station and park there while shopping or dining nearby if there was free parking near the station?

6 Current parking habits

Table 7: Top 3 places people park when they drive to a train station now

	0 5km	5 10km	10 15km
Park at station	33%	53%	61%
Park on residential streets	23%	24%	20%
Park on main streets	9%	7%	3%
Base (n=)	69,212	89,694	103,268

Question P2: Thinking about driving to the train station, where do you park?

Table 8: Top 4 reasons for not driving to a station and parking

	0 5km	5 10km	10 15km
It's hard to get parking	59%	85%	52%
It's close enough that I don't need to drive	64%	23%	20%
Parking is expensive	27%	26%	0%
Don't like to leave my car in a car park	11%	15%	16%
Base (n=)	69,212	89,694	103,268

Question C8: What are the main reasons you wouldn't drive to the train station?

7 More insights

Table 9: Frequency of visiting the precinct

	0 5km	5 10km	10 15km
Frequently	20%	9%	3%
Occasionally	74%	63%	48%
Less often	6%	28%	49%
